

MODBAR TECHNICAL BULLETIN #19

planned maintenance checklist and pre-installation specifications

Dear Modbar family member,

We are pleased to bring you the newest additions to the Modbar support pages... Planned maintenance checklists and pre-installation specifications.

The checklists will help you maintain your Modbar equipment to a consistent standard, and are available for 3, 6, 9 and 12 month increments. This can still be tailored to the volume of the site, as required.

The pre-installation specifications include all instructions for plumber, electrician, architect or designer, outlining the specific requirements prior to installation of the modules and taps.

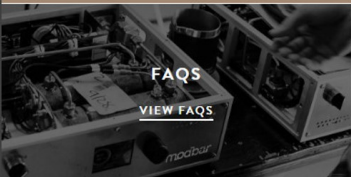

Checklists and pre-installation specifications are available for all types of system.
